Medical Genetics Awareness Week Highlights

Joy of the Work

The seventh annual Medical Genetics Awareness Week was a successful celebration of the field of medical genetics thanks to ACMG members and the global medical genetics community. This year's theme, "The Joy of Working in Medical Genetics," placed a special emphasis on the "appreciation" medical genetics professionals have for their patients and colleagues.

GenePod: Delving Deeper into *RYBP*

De novo *RYBP* variants cause a novel syndrome with developmental delays, feeding difficulties and congenital anomalies. A new study in *Genetics in Medicine* finds that DNA methylation studies suggest a possible episignature associated with *RYBP*-related disorder. One of the authors of this study joined the April *GenePod* to discuss the team's findings.
