

ACMG Strategic Plan 2025–2029

ACMG is the professional society for clinical and laboratory genetics and genomics

Vision

ACMG will empower its members to be leaders in the integration of genetics and genomics into all of medicine and healthcare, resulting in improved personal and public health.

Mission

To reinforce and expand ACMG's position as the leader and prominent authority in the field of medical genetics and genomics, including clinical research, while educating the medical community on the significant role that genetics and genomics will continue to play in understanding, preventing, treating and curing disease.

Strategic Pillars

- 1** | Establish ACMG as the primary genetics and genomics educational and informational resource.
- 2** | Define and promote ACMG's role as a leader in the genetics and genomics specialty.
- 3** | Advocate for policies and initiatives that advance the interests of genetics and genomics.
- 4** | Expand the workforce in genetics and genomics.

Objectives for Strategic Pillars

Pillar 1

Establish ACMG as the primary genetics and genomics educational and informational resource.

1. Expand ACMG's evidence-based health care program: production of professional practice informational and guidance documents
2. Increase and diversify target audiences for the Annual Meeting and other educational offerings
3. Expand educational offerings for healthcare professionals

Pillar 3

Advocate for policies and initiatives that advance the interests of genetics and genomics.

1. Advocate for coverage and reimbursements
2. Advocate for access to care
3. Advocate for ACMG as the leader in the profession

Pillar 2

Define and promote ACMG's role as a leader in the genetics and genomics specialty.

1. Be the leader in genetic knowledge, management, and therapy
2. Define the evolving role of the specialty in healthcare and the scope of practice in medical genetics
3. Continue to be the professional society for clinical and laboratory genetics professionals
4. Serve as the convener to develop strategies to integrate genetics and genomics into other specialties and healthcare

Pillar 4

Expand the workforce in genetics and genomics.

1. Work with partners to promote innovative training pathways
2. Disseminate information about improved practice models
3. Emphasize career opportunities throughout genetics and genomics educational pathways
4. Identify and advocate for ways to expand funding for genetics and genomics training
