

Medical Genetics Awareness Week Video Activity

“In the Year 2034, Medical Genetics...”

Medical Genetics: Past, Present, Future
*From Experience to **Expectation***

Video Activity: “In the Year 2034, Medical Genetics...”

Post a **short video** to social media during **MedicalGeneticsAwareness Week** (March 13-16) that shares your hopes for **the future of medical genetics!** Where will the field be 10 years from now?

Your video could feature yourself or your colleagues, be straight forward or fun. **Nothing fancy - keep it between 30 and 60 seconds.** Post it with the **#MedicalGeneticsAwareness** hashtag.

We can't wait to see your “crystal ball” video predictions!

#MedicalGeneticsAwareness

Help us celebrate Medical Genetics Awareness Week (March 12-15, 2024) by **sharing your hopes, dreams or predictions for where the field will be 10 years from now in a short video (30-60 seconds) posted to social media.**

Your vision might be about something clinical or therapeutic that will improve patient care, an innovation that will revolutionize the field, or perhaps something about the medical genetics workforce becoming more diverse.

Use your personal “crystal ball” and share your vision for the future in a brief video that you will post to social media (X/Twitter, Instagram and/or Facebook) during Medical Genetics Awareness Week, March 12-15, 2024. **Your video does not have to be fancy – have fun with it!**

Instructions

Here are easy steps and reminders to help you create your video:

- Find a spot with **good lighting to film that is quiet enough so that your voice is audible** to video viewers. (Keep it simple – there’s no need for fancy production values!)
- Be sure to say your name, state/country, and the job/role you play in the medical genetics field.
- **Explain your hope, dream or prediction of the future of medical genetics by the year 2034.**
- Add a few words about why this hope for the future is important to you and the impact that it will have for others.
- Keep the length of your video between **30 and 60 seconds.**
- **Please remember to use the hashtag #MedicalGeneticsAwareness** when you post your video during the week of **March 12-15, 2024.**

Use your phone’s camera. Or **record yourself using Zoom** via Zoom Clips. Here’s how:

- Sign into the Zoom web portal.
- In the navigation menu, click Clips.
- On the right of the page, click Create Clip.
- You will be redirected to open your Zoom application and a Create Clip small window will display.

- Click Start Recording (A count-down timer will start to give you time to get ready.)
- For more details, visit: <https://bit.ly/ZoomClip>

We can't wait to watch all your wonderful submissions! **If you have questions, please contact mnguyen@acmg.net.**
